Sprint 4 Planning

This sprint we will be focusing on the following user stories:

- Creating a commenting system where an authorised user can comment on a question.
- Creating a commenting system where an authorised user can comment on an answer.
- Implement a voting system in which an authorised user can vote up or down an answer and the answers appear by vote.
- Creating customable tags for questions that an authorised user can use to filter through questions with.
- Create an admin that can close questions, delete answers and comments.
- Create a marking system where an authorised user can mark an answer if it is correct.
