Sprint 3 Planning

This sprint we will be focusing on the following user stories:

- Creating a commenting system where an authorised user can comment on a question.
- Creating a page where authorised users can answer questions and their answers can be seen by every authorised user.
- Creating a voting system which an authorised user can use to vote up or down an answer and the answers appear by vote.
- Creating tags for questions.
- Creating a filtering system where an authorised user can view specific tags only.
